

WIRE MESH PRE CRIMPED

C I S a
SIEVING TECHNOLOGIES

MATERIALS

- Grey steel
- Galvanized steel
- AISI-304
- AISI-310
- AISI-316

As it happens with the crimped meshes, the pre-crimped clothes are made with pre-shaped wires. There is a slight undulation that gives strength to the mesh, and this allows to obtain meshes with wires of bigger diameters for small mesh openings.

The range of manufacture, starts from 4,00 mm up to 21,00 mm., with diameters of wire between 1,50mm.Ø up to 4,00mm.Ø. Do not hesitate to ask for any other special form.

These wire clothes are very useful for meshes that must support great mechanical stresses. They can be delivered on plates, with a width up to 2,00 M. They are made in different materials: Galvanized Steel, Stainless Steel (AISI- 304, AISI-316, AISI-310), soft steel, monel, etc.

Weft mm.	Warp mm.	Fo %	G Kg/m²
4,00	2,00	44,44	8,92
4,50	1,50	56,25	5,02
5,50	1,50	61,73	4,30
